

## INFORMATION ANALYST

Water Safety New Zealand (WSNZ) provides leadership within the water safety sector in New Zealand. This includes a vital role in water safety education, awareness and prevention initiatives in the community.

The Information Analyst is responsible for the management of WSNZ's databases; answering statistical queries and assisting prepare policy related documents. The role will ensure that WSNZ is recognized as a credible source of water safety information and data and that a sound evidence base is used for WSNZ and its members' educational initiatives and interventions.

The role requires a person with experience and background including:

- Sound knowledge of database applications such as Microsoft Access and web based products.
- Have an eye for detail to ensure accuracy and integrity of data.
- Visibly strong and capable IT and organizational skills.
- The ability to analyze and process data into various reports for interpretation.
- An understanding of qualitative and quantitative methodology.
- An ability to prepare reports logically and quickly.

You will be working with a professional organisation, staffed by a dedicated team based in Wellington (Head Office), Auckland and Dunedin. This position forms an important component of the WSNZ operations, the remuneration offered will take into consideration your experience and ability.
