

PROJECT MANAGER

Water Safety New Zealand (WSNZ) provides leadership for the water safety sector in New Zealand. This includes playing a vital role in educating New Zealanders in water safety and promoting water safety issues in the community.

The Project Manager will be responsible for the development and management of water safety and drowning prevention initiatives. This will involve the application of expert technical and analytical skills in order to ensure effective management and communication of WSNZ policies and projects to the community.

The Project Manager will undertake functions essential to the ongoing task of reducing drowning incidents and water related injuries in New Zealand. An understanding of the Health and Physical Education Curriculum and education sector is required. The role will involve the review, development and promotion of classroom education resources and community resources.

An element of event management and meeting facilitation experience is also desired.

This role requires a person with experience and background including:

- Extensive working knowledge of the Health & Physical Education Curriculum
- An understanding of water safety issues
- Excellent relationship management and communication skills
- Excellent project planning and financial management skills

You will be working with an innovative, community focussed and professional organisation, staffed by a dedicated team based in Wellington (Head Office) and Regional Managers (3). The Project Manager role forms an important part of the WSNZ operations, the remuneration offered will take into consideration your experience and ability.
